

110 MULTI-STRIPPER

MACHINE PRINCIPLE

Multi-Stripping machines provide a quick and efficient solution for removing tiles, vinyls, carpets and old flooring systems.

The operator selects a sharpened blade (a range of types and sizes are available) suitable for the surface to be removed, which is then attached to the front of the machine. The weight of the machine holds the blade and oscillates hard onto the floor to affect the removal process.

DESCRIPTION

The 110 multi-stripper has been designed to lift a range of floor coverings with minimal effort. The tempered steel blades ensure optimum cutting results, capable of lifting 50m of vinyl tiles per hour.

Ideal for confined areas and edge removal where larger sit-on machines are unable to access.

FEATURES

- Production rates up to 50m² vinyl tiles per hour
- Lightweight and easy to use
- Robust design
- Flexibility to use in confined spaces
- Maintenance free

APPLICATIONS

Removal of sheet vinyl, tiles, carpet, carpet tiles, foam rubber, felt and their underlying adhesives and levelling screeds, prior to the application of Resdev's fully comprehensive range of epoxy and polyurethane flooring systems.

The method of preparation is dependent upon both the substrate and the type of product used. For further information please refer to Resdev's product specific datasheets, specification information and material safety data.

110 MULTI-STRIPPER MACHINE SPECIFICATION
Height 1500mm
Length 1100mm
Width 700mm
Power 110v (Also available in 240v)
Vibration Level Less than 2.50m/s ²
8 hours+

ACCESSORIES

Flat Blade

- for removal of tiles

Winged Blade

- for removal of sheet material

Transformer

- Dual socket 3kva 16 amp 110v

Extension cable

- 16amp 110v – 10m length

83dB (A)
