

# HAND MIXERS

## MACHINE PRINCIPLE

The hand mixers are robust power tools that generate a fast, thorough mix action. Modern screed and epoxy coatings require constant mixing.

## DESCRIPTION

The Single Paddle Mixer has two speeds with the extra slow speed ideal for mixing heavy materials, and is supplied with a spiral paddle.

The Twin Paddle Mixer features a positive contra-rotating mix action which does not twist against the operator, minimising fatigue, particularly with heavy, stiff materials and the paddles also reduce air entrapment. This mixer is ideally suited to multi-component, specialist materials and critical mix applications.

## FEATURES

- Soft start and a variable speed to minimise splashes.
- The H handle gives easy handling and a comfortable work position
- Frame protects the power tool from knocks and damage.
- Powerful motors and longlife gearbox

## APPLICATIONS

Ideal for mixing Resdev's fully comprehensive range of epoxy and polyurethane flooring systems.

The method of preparation is dependent upon both the substrate and the type of product used. For further information please refer to Resdev's product specific datasheets, specification information and material safety data.

SINGLE PADDLE HAND MIXER SPECIFICATION	
Working Width 150mm	Weight 7.2kg
Speed 230/560 rpm	Capacity 150kg
Motor 1700w	Output up to 1200kg/hr

TWIN PADDLE HAND MIXER SPEC	
Working Width 220mm	Weight 5.8kg
Speed 450 rpm	Capacity 100kg
Motor 1150w	Output up to 800kg/hr

## ACCESSORIES

### Single Paddles

### Twin Paddles

### Transformer

- Dual socket 3kva 16 amp 110v

### Extension cable

- 16amp 110v – 10m length
