

# Mozaico Classic Colour Chart

Mozaico Classic is an epoxy resin based seamless terrazzo flooring system using marble and granite in a classical palette. With a neutral off white background colour to maintain a self assured and relaxed theme that will stand the test of time and blend easily with corporate and interior design schemes, it is available in an elegant range of colour combinations as standard.

Mozaico Classic is ideal for large projects where marble would traditionally be used. The application technique and thin section abilities of a resin system offer the added benefits of durability and seamless integrity.

Some colours in some systems can be affected by UV light over time. Non standard colours are available on request. The colours shown may differ from the original product due to reprographic and technological media variations. The same colour in different products may also vary due to the composition and texture of the final finish. If colour and final aesthetics are of concern, please contact us to request an actual sample of the colour and system required.
