

# Mozaico Spectrum Colour Chart

Mozaico Spectrum is an epoxy resin based seamless terrazzo style flooring system using responsibly sourced, recycled clear glass within the resin matrix. In a range of 8 strong yet stylish colour combinations, it is designed to accentuate the contemporary feel of an installation by becoming a statement piece in its own right.

Environmentally aware whilst remaining visually indulgent, Mozaico Spectrum is a durable, practical and attractive solution with an easy to clean and hardwearing finish.

Some colours in some systems can be affected by UV light over time. Non standard colours are available on request. The colours shown may differ from the original product due to reprographic and technological media variations. The same colour in different products may also vary due to the composition and texture of the final finish. If colour and final aesthetics are of concern, please contact us to request an actual sample of the colour and system required.
