

Rondeau Natural Colour Chart

Rondeau Natural is an epoxy resin based decorative stone flooring system designed to bring the beauty of the landscape into a commercial setting. Naturally derived and sourced stone particles are encapsulated within a resin binder to produce an attractive, slip resistant finish with an open yet rounded texture.

Suitable for use in showroom and open complex environments, Rondeau Natural is available in a range of harmonious colour blends. It is easy to dry and wet vacuum clean to remove surface dust and is warm and tactile to the touch. With the appearance of sea smoothed pebbles, it can be coated with a clear sealant to offer increased durability and resistance.

Some colours in some systems can be affected by UV light over time. Non standard colours are available on request. The colours shown may differ from the original product due to reprographic and technological media variations. The same colour in different products may also vary due to the composition and texture of the final finish. If colour and final aesthetics are of concern, please contact us to request an actual sample of the colour and system required.
